DETAILED ACTION

Status of Claims

1. Claims 7-12 are new and ready for examination. Claims 13-14 are new.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 7-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dorfman et al. (US Patent 6,103,392).
4. Dorfman et al. is applied to the claims for the same reasons as stated in pp. 3-4 of the previous office action.
5. Claims 7-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jech et al. (US Patent 5,686,676).
6. Jech et al. is applied to the claims for the same reasons as stated in pp. 4-6 of the previous office action.
7. In regards to claim(s) 13-14, Jech et al. discloses Cu wt% ranges (col. 5, lines 4-16) that overlap the claimed ranges establishing a case of prima facie obviousness. It would have been obvious to one of ordinary skill in the art to select the claimed range from the prior art range because prior art teaches the same utility over the entire range. See MPEP 2144.05.

Response to Arguments

8. Applicant's arguments filed 8 January 2007 have been fully considered but they are not persuasive. In regards to Applicant's argument that Dorfman et al. and Jech et al. do not teach the second heating step without an isothermal hold, Applicant is reminded that prior art is not limited to an embodiment, but includes the entire disclosure. In regards to Applicant's argument that Figs. 5A, 5B, 6A and 6B establish an inventive step over the prior art, Applicant is reminded that the comparison must be made with closest prior art (Jech et al. and Dorfman et al.) to establish criticality.

Conclusion

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

10. A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
